Discussion mechanics

"Unable to set the NumberFormat property of the Range class"

Asked 8 years, 1 month ago · Active 8 months ago · Viewed 13k times

3 ▲ This code has been working for ages. I thought maybe I accidentally pressed a key but I cannot seem to see it. I suddenly got the error: **Unable to set the NumberFormat property of the Range class** in the below code: A

The strange thing is that I haven't changed anything. I was considering including more cells with number formatting, but I never implemented it :s May 29, 23:28

See this link [support.microsoft.com/kb/...](https://support.microsoft.com/kb/213904)

ahhh. I know why I never got the message earlier C

2 ▲ Also what is the value of `xl`, `xl`, `xl`, `xl` at the time of error? – Siddharth Rout May 29 '12 at 14:59

1 Is your Sheet Protected? – Siddharth Rout May 29 '12 at 14:57

1 Did you check if it is protected? – Siddharth Rout May 29 '12 at 15:03

1 let us [continue this discussion in chat](#) – Siddharth Rout May 29 '12 at 15:11 B

6 ▲ The problem as discovered in Chat was the workbook had more than 64,000 formats because of which the user was getting the "Too many different cell formats" error message in Excel D

Solution

Topic: You receive a "Too many different cell formats" error message in Excel
